

Anshumaan Vats

Software Engineer | Bengaluru, India (Open to relocation) | +91 9996945185 | anshumaanvats17@gmail.com | linkedin.com/in/anshumaanvats | anshumaanvats.vercel.app

PROFESSIONAL SUMMARY

Innovative Software Engineer with a focus on Fullstack Development, RPA, and **Generative AI**. Experienced in building scalable applications and **e-commerce platforms with custom configuration engines** using **React, Node.js, and Python**. Proven track record of innovation with **4 published patents** and certifications from industry leaders like **Google, AWS, and Oracle**. Expert at optimizing operational efficiency through intelligent automation.

TECHNICAL SKILLS

- Languages:** Python, JavaScript, SQL, C++, Embedded C
- Backend & Cloud:** Node.js, Express.js, AWS (Solutions Architecture), Firebase, REST APIs
- Frontend:** React, Tailwind CSS, HTML5/CSS3, Vite, Figma
- AI & Automation:** Generative AI (LLMs), UiPath, Automation Anywhere, Mendix, Arduino
- DevOps & Tools:** Git, GitHub Actions, Vercel, CI/CD, Docker (Knowledge)
- Specialized:** IoT Integration, Robotic Process Automation, Cybersecurity Fundamentals

EXPERIENCE

Tata Advanced Systems

Hyderabad, India

Software Engineer Intern

Aug 2024 – Sept 2024

- Developed and deployed **RPA bots** that streamlined full-stack business applications, significantly boosting operational throughput.
- Enhanced backend business logic using **Python, Node.js, and SQL**, resulting in a **30% reduction in manual data processing effort**.
- Collaborated with cross-functional teams to integrate automated workflows into legacy systems.

AICTE IDEA Lab

Panipat, India

Robotics Intern

July 2023 – Aug 2023

- Designed and optimized automation scripts using **Arduino and Python** for embedded control systems.
- Implemented data-driven **IoT workflows**, improving robotic task execution reliability and precision by 25%.

Freelance

Remote

Web Developer

Mar 2022 – Apr 2023

- Architected **CareCrew**, a specialized e-commerce platform featuring a **wheelchair customization** and ordering system.
- Built the frontend using **React and Tailwind CSS**, allowing users to configure hardware specifications in real-time before checkout.
- Utilized **CI/CD pipelines** on Vercel to improve deployment **speed by 40%**.

PROJECTS

Omni-Mate Wheelchair

Arduino, C++, React, IoT

- Developed a full-stack website for specialized mobility equipment with a **customization-to-order workflow**.
- Engineered a dynamic UI component that updates wheelchair visual models and pricing based on user-selected modifications

Enterprise RPA Bot Suite

UiPath, Automation Anywhere, Python

- Architected bots to automate repetitive business tasks, **increasing workflow efficiency by 50%** while eliminating human error in critical process pipelines.

PUBLISHED PATENTS

Omni-Mate Wheelchair: Application No - 202411041958

Robotic Personal Assistance System: Application No - 202311063214

Truck Overloading Detection System: Application No - 202311064317

Parking System: Application No - 202311063488

EDUCATION

Kurukshetra University

India

B.Tech in Computer Science and Engineering — CGPA: 8/10

2021-2025

ACHIEVEMENTS & CERTIFICATIONS

- 1st Position:** Hack for Impact – IIIT Delhi (2025) & National Technology Day (2024).
- Certifications:**
 - Generative AI:** Google Cloud & Outskill (Sept 2025)
 - Cloud & Architecture:** AWS Solutions Architecture (Dec 2024)
 - Software Engineering:** Electronic Arts (Jan 2025) & TATA (Cybersecurity)
 - Databases:** Oracle Academy (SQL/Java)
- Leadership:** Speaker at Principal Conclave; Mentor for Govt. School Robotics Drive.
